# REVIEW CONFIRMATION CERTIFICATE

We are pleased to confirm that

*Hussain Ahmad*

has reviewed 1 paper for the following MDPI journal in 2025:

*Journal of Cybersecurity and Privacy*

---

*S. Tochev*

Stefan Tochev, Chief Executive Officer  
11 October 2025

MDPI is a publisher of open access, international, academic journals. We rely on active researchers, highly qualified in their field to provide review reports and support the editorial process. The criteria for selection of reviewers include: holding a doctoral degree or having an equivalent amount of research experience; a national or international reputation in the relevant field; and having made a significant contribution to the field, evidenced by peer-reviewed publications.

CAUTION: External email. Only click on links or open attachments from trusted senders.

Dear Hussain Ahmad,

We would like to thank you for the reviews and discussion submitted so far. It will really help us to put together an exciting program for ICSA 2026!

The purpose of this email is, first, to thank everyone who volunteered for the last-minute review assignments. It's a testament to the ICSA community that so many people came forward. Thankfully, we had enough volunteers that all the new reviews have been allocated.

Second, we would like to provide transparency about our efforts to detect improper AI use in reviews. We tried a new experiment this year: We inserted a watermark [1] into the PDF of each paper after it was submitted. Authors were notified of this after they submitted. If the watermark appears in the final reviews but not in the paper, this is strong evidence of an AI-generated review.

One side effect is that some of you noticed the watermark on the paper and commented on it in your reviews. If you did that, please remove any references to it from your reviews. If your detection of the watermark affected your paper score in any way, please reconsider your score in light of this new fact.

We will share a more detailed account of this initiative and its outcomes in the coming weeks. For now, we are happy with the diligence and care you have shown in your reviews and the seriousness with which you take the integrity of the scientific process. Successful communities are built on your hard work, and we are thankful for that.

Best regards,  
Anne and Bradley

**To:** surbhi.tyagi@ieee.org  
**Subject:** Thank you for reviewing IoT-55847-2025

17-Dec-2025

Manuscript: IoT-55847-2025

Title: "Mobility-Aware Adaptive Microservice Deployment and Scheduling in Cloud-Edge Collaborative Environments"

Authors: Xu, Wei; Tang, Bing; Zhang, Li; Cao, Buqing; Yang, Qing; Li, Kuanching

Dear Reviewers:

Thank you very much for serving as a reviewer for the above-mentioned paper. We are grateful that you were willing to take time from your other duties and commitments to complete this review. The Final Decision on this paper is: \*Reject (revise and resubmit)\*.

The reputation of IEEE Internet of Things Journal is being enhanced by the cooperation, dedication, and expertise of its reviewers. Your careful consideration of this manuscript has helped ensure that each paper published in the Journal meets our high standards. Along with the rest of our professional community, we sincerely appreciate your efforts.

We hope that you will continue to act as a reviewer for the IEEE Internet of Things Journal. If you have not already done so, please provide your fields of interest as keywords in your ScholarOne Manuscripts user profile at <https://mc.manuscriptcentral.com/iot> so that we can match your areas of expertise with future submitted manuscripts. If your contact information has changed, please take a moment to update your record.

Please do not hesitate to contact us if you have suggestions for improving the Journal. Our major goal is the rapid publication of high-quality manuscripts. Feedback from our reviewers is an important factor in the decisions that we make to achieve this goal.

Sincerely,  
Prof. Nei Kato  
Editor-in-Chief, IEEE Internet of Things Journal

**Subject:** HDR Representation for Gender, Equity, Diversity, and Inclusion (GEDI)

Dear HDRs,

I am excited to announce that alongside serving as the CompSci HDR Representative, I have taken on the role of the Gender, Equity, Diversity, and Inclusion (GEDI) representative for the School of Computer and Mathematical Sciences.

I would also like to introduce you to the faculty HDR reps (cc'd), Zane and Alison who are from the School of Ag Food and Wine and School of Biological Sciences respectively, and who sit on the faculty GEDI board.

As the GEDI HDR rep, we aim to establish a communication network with all HDR students surrounding GEDI areas of interest, concerns, and feedback.

In particular, we are interested in improving the support available for HDR students in the following areas:

- LGBTQI+
- Neurodiversity
- Disability support
- Support for Indigenous Australians
- Cultural Awareness

We would love to hear some feedback from you regarding any of these areas or general GEDI concerns. This may include ways that we could improve inclusivity within the school, support networks that you would like established or any additional support you would like provided.

We will use this feedback to establish points for discussion in faculty wide GEDI meetings. Please feel free to forward this feedback, questions or comments to myself, Zane, or Alison.

Looking forward to hearing from you and if you have any question or anything else you would like to discuss please feel free to get in touch.

Cheers,

**Hussain Ahmad (He/Him)**

*PhD Candidate, University of Adelaide*
