

2025 Tri2 - Teacher Report for COMP SCI 7328 Concepts in Cyber Security (Hussain Ahmad)

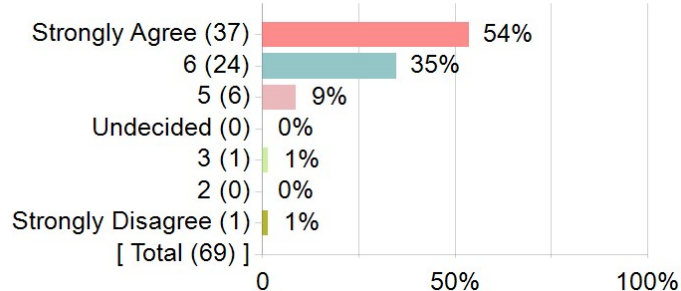

Project Title: **Student Experience of Learning and Teaching (eSELT)**

Courses Audience: **205**
Responses Received: **69**
Response Ratio: **34%**

Course Report for COMP SCI 7328 Concepts in Cyber Security

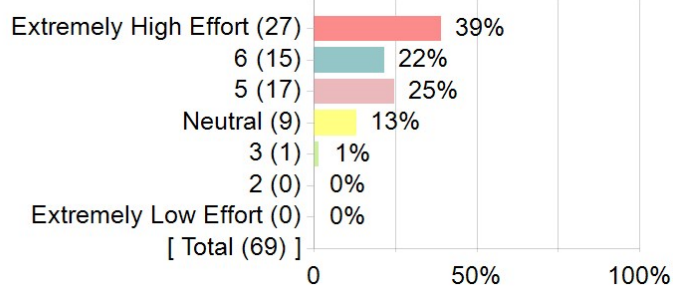

1. This course helps me to build my understanding of key concepts.  <table border="1"> <thead> <tr> <th>Statistics</th> <th>Value</th> </tr> </thead> <tbody> <tr> <td>Mean</td> <td>6.4</td> </tr> <tr> <td>Median</td> <td>7.0</td> </tr> <tr> <td>Standard Deviation</td> <td>0.9</td> </tr> <tr> <td>% Broad Agreement</td> <td>99%</td> </tr> </tbody> </table>	Statistics	Value	Mean	6.4	Median	7.0	Standard Deviation	0.9	% Broad Agreement	99%	2. Overall, this course is intellectually stimulating.  <table border="1"> <thead> <tr> <th>Statistics</th> <th>Value</th> </tr> </thead> <tbody> <tr> <td>Mean</td> <td>6.2</td> </tr> <tr> <td>Median</td> <td>7.0</td> </tr> <tr> <td>Standard Deviation</td> <td>1.2</td> </tr> <tr> <td>% Broad Agreement</td> <td>94%</td> </tr> </tbody> </table>	Statistics	Value	Mean	6.2	Median	7.0	Standard Deviation	1.2	% Broad Agreement	94%

% Broad Agreement	99%																				

7. This course is well organised.

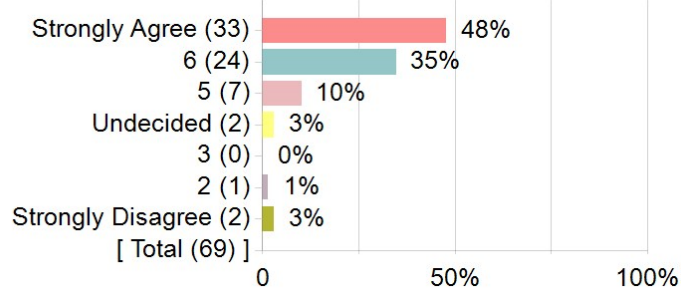

Statistics	Value
Mean	6.3
Median	7.0
Standard Deviation	1.0
% Broad Agreement	97%

8. How much effort have you put into this course?

Statistics	Value
Mean	5.8
Median	6.0
Standard Deviation	1.1
% Broad Effort	86%

9. Overall, I am satisfied with the quality of this course.

Statistics	Value
Mean	6.1
Median	6.0
Standard Deviation	1.3
% Broad Agreement	93%

Teacher Report for COMP SCI 7328 Concepts in Cyber Security (Hussain Ahmad)

1. Is approachable and helpful.	
Strongly Agree (52) 6 (14) 5 (1) Undecided (0) 3 (0) 2 (0) Strongly Disagree (0) [Total (67)] 78% 21% 2% 0% 0% 0% 0% 0 50% 100%

What are the best aspects of Hussain Ahmad's teaching?

Comments
I love his teaching especially because he teaches with more real world examples and keeps things more practical. The in class group discussions were also very useful.
He solves small doubts and provides clear explanation.
NA
Good at teaching, always provides lectures in a smiley face. Knowledge is admirable. Well behaved and punctual.
Explains cybersecurity concepts in a clear and structured way
Uses practical examples to connect theory with real-world situations
Encourages class participation and open discussion
Provides step-by-step guidance during labs and exercises
Shows strong expertise and enthusiasm for the subject
Ask ChatGPT
He is a great teacher; his teaching method is effective, and he keeps everyone engaged & encourages participation. The best thing is, he takes special care & checks in on those who are falling behind. I was struggling after coming late due to my late visa approval. He encouraged me & always checks on me. I am grateful to him.
Hussain explains cybersecurity concepts clearly and connects them to real-world examples, making complex topics easier to understand. He is approachable, encourages discussion, and creates an engaging environment that supports active participation.
The use of real life examples
student engagement
He prepares well for the lecture, and his materials are up-to-date and well-cited. He does not just give us motherhood statements regarding concepts in cybersecurity, he provides real-world experience and evidences from recent researches. His teaching staff also provides timely feedback regarding our work. He always reiterates the assessments of the course and provides opportunities for students to challenge results of assessments for reconsideration.
He is friendly and smiles all the time. He is a good teacher.
Very friendly and encourages group discussions, something I find very effective.
Feedback on time with helpful answers
1. I think as an educator, he is very approachable and I appreciate that in each class he checks in on us students and provides opportunities for us to ask questions or clarify on any concerns related to the assignments. 2. I also appreciate that he organises drop-in sessions for not only the RangeForce modules but also after the first assignment, which gives students a chance to obtain feedback on their work.
Voice volume and tone
He knows the subject, can relate to students, has a great team of assistants.
Hussain was passionate about the topic and discussed each concept in detail and with examples, this helped me understand the material in context.
Workshops
He is quite approachable and helpful.
He was good in clearing doubts
Always willing to help and get our doubts solved.
The timely feedback is really helpful, especially if we want to improve our succeeding assessment outputs. He also made the workshops as engaging as possible even though that for most of us (not cybersecurity students), the topics are not really interesting. But surprisingly, I really enjoyed and learned a lot from this course.

Comments
Also, Hussain is really open in discussing our topics, and even the result of our assessments, if we have questions. And he is also flexible to make changes, if needed.
He is also very understanding and patient (so much, actually). Even though that Hussain already made all his MyUni announcements crystal clear, some students would still ask questions, which answers are already provided by Hussain. At first, it's OK, but later on, as weeks pass by, I'm already annoyed by these students who don't read. Because instead of discussing our topics for that day more deeply, time is wasted in answering their questions, which are unnecessary, if only they have read Hussain's announcement.
He always relates the course content to real-world cyber attacks, which is really helpful, and he's really approachable. He always replies to emails very fast. Yeah, he's doing great.
He is very intellectual which encourage to participate in class.
Hussain is very supportive and attentive. He checks in on all students and keeps track of our progress and submissions. He makes sure we stay on track and submit our work on time, which really helps with time management and staying organised.
everything
He was a good lecturer. He did his best to deliver this course.
He teaches fluently and has good understanding of the topics. He is also interactive with students that are having a hard time to understand the concept.
Hussain's teaching is highly effective due to his clear explanations, structured delivery, and ability to make complex cybersecurity concepts accessible. He consistently connects theoretical knowledge to practical, real-world applications, which helps deepen understanding and shows the relevance of each topic.
His sessions are engaging and interactive, encouraging student participation and questions. He creates a supportive learning environment where students feel comfortable seeking clarification and sharing ideas. Hussain also demonstrates strong subject-matter expertise, using relevant examples, case studies, and industry insights to enhance learning.
al good
Very practical and helpful.
Makes class Interesting
Very engaging
One of the best

Hussain Ahmad could improve student learning by ...

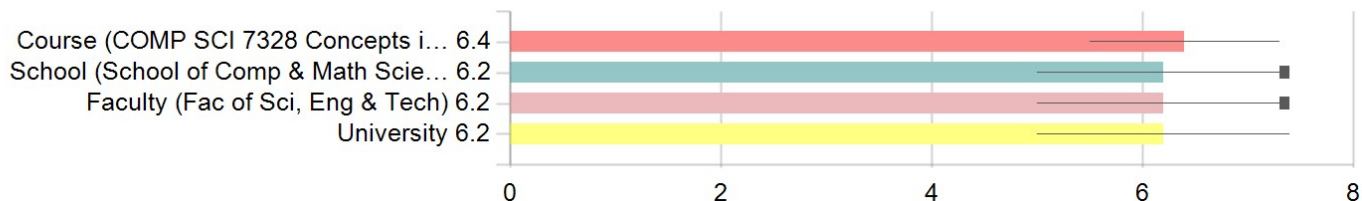

Comments
Classes should have compulsory attendance and in class activities.
NA
Putting some more practical learnings, decrease RangeForce pressure so that the students can learn slowly and perfectly rather than rushing.
Adding more interactive, hands-on lab activities
Providing extra practice materials and revision quizzes
In my opinion, everything is alright.
Ensuring third party platforms are easily accessible for his course
recording lectures
Providing more concrete examples to contextualise why cybersecurity is an important core course for AIML and Data Science students, and not just from the POV of Cybersecurity students.
Keep doing what he is doing
1. Making the quizzes harder because students have been scoring high marks is not a good way to distinguish "good" students from "bad" students – instead, it will end up punishing honest students who answer the quizzes on their own without relying on AI tools.
Really enjoying teaching, being authentic while teaching.
Making workshop attendance mandatory
All good
I wish he was a bit more present at the end of the trimester.
Nothing
Maybe adding 1 or 2 onsite quizzes (instead of online), wherein our computers will be locked to the quiz window only. I heard that some students just use ChatGPT in answering the quizzes, which is sad because the learnings from this course are really valuable for any field, even for non-IT students or regular person.
Personally, he's doing exceptionally well, but the activities in the tutorial seem too long. Maybe they could change the tutorial style. I don't know, but he's great.
Less percentage should be given to range force part .
Not Applicable
nothing
He can be more efficient in his teaching by giving even more better analogies
Hussain could improve student learning by incorporating more hands-on, scenario-based activities that allow students to apply concepts in realistic cybersecurity situations
no
He's good at it.
nothing to say
NA
Nothing but getting extension is hard

2025 Tri2 Comparison Statistics

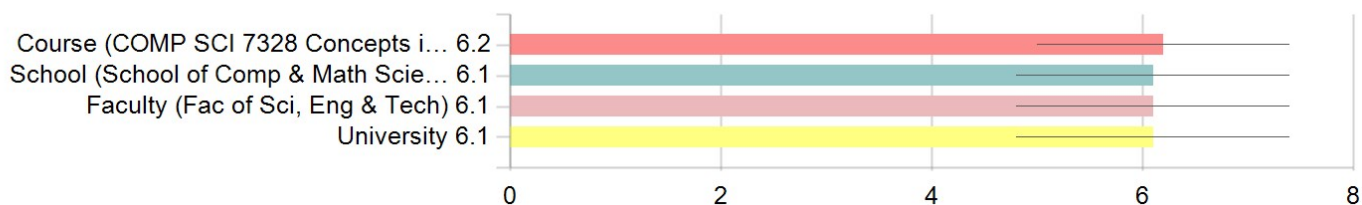

Mean (average valid student responses between 1 and 7) and Standard Deviation (Standard deviation of valid student responses) are used for comparison statistics between Course, School, Faculty and University.

Course Report for COMP SCI 7328 Concepts in Cyber Security

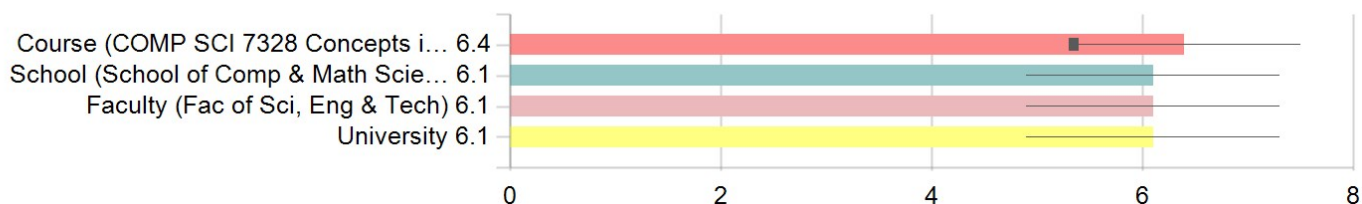

1. This course helps me to build my understanding of key concepts.

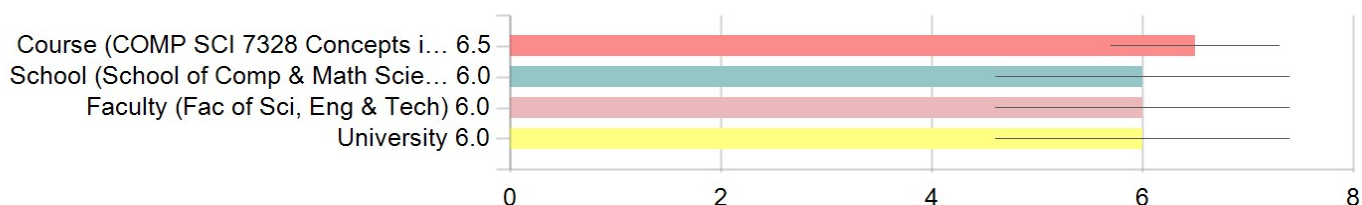

2. Overall, this course is intellectually stimulating.

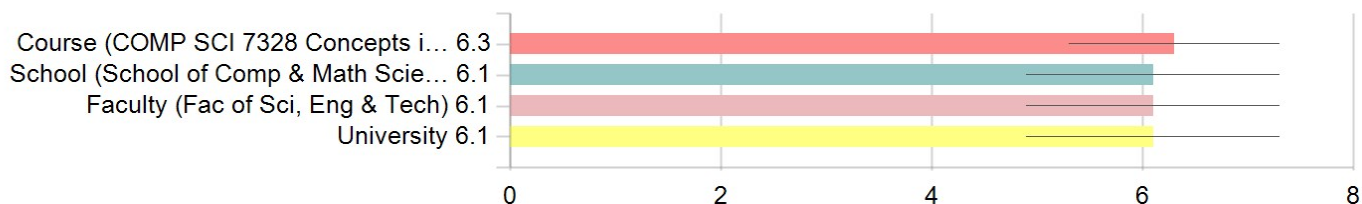

3. This course includes digital activities and resources that help me learn.

4. In this course I receive useful and timely feedback on my work.

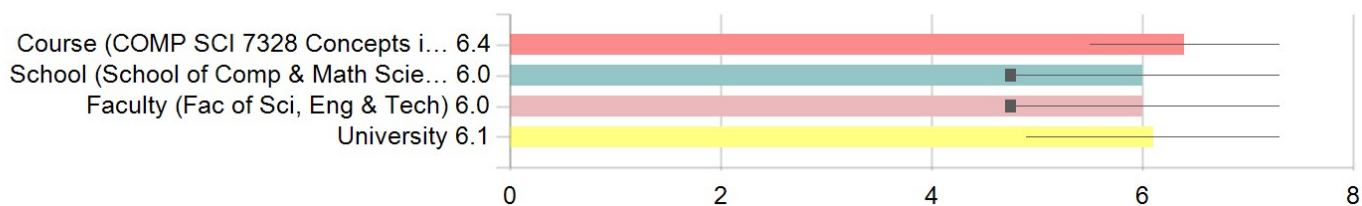

5. The assessment tasks in this course help me learn.

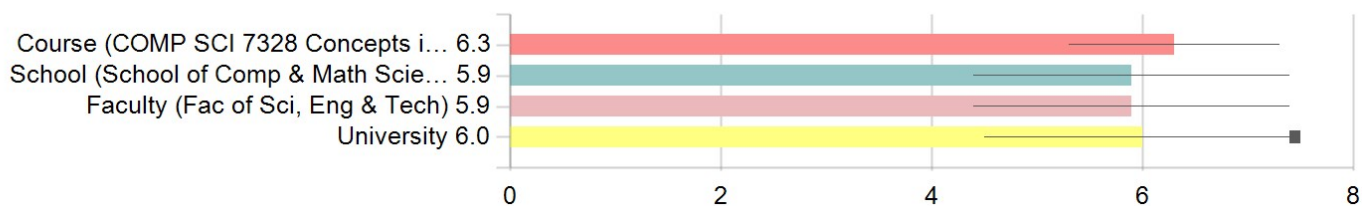

Course Report for COMP SCI 7328 Concepts in Cyber Security (continued)

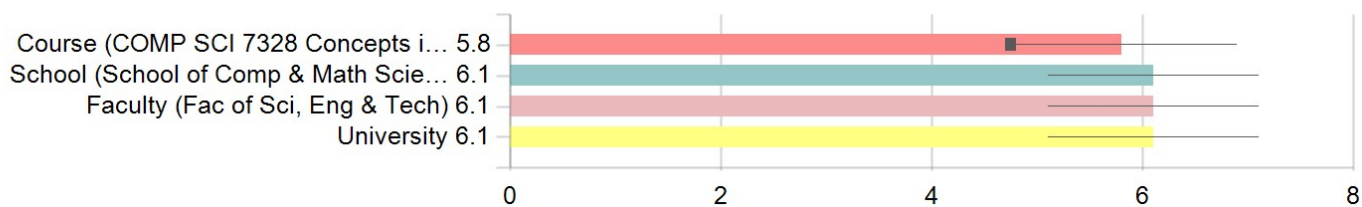

6. In this course diverse perspectives are valued and difference is accommodated.

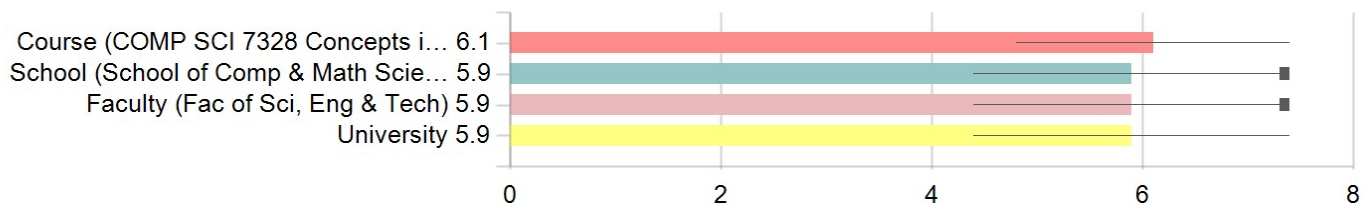

7. This course is well organised.

8. How much effort have you put into this course?

9. Overall, I am satisfied with the quality of this course.

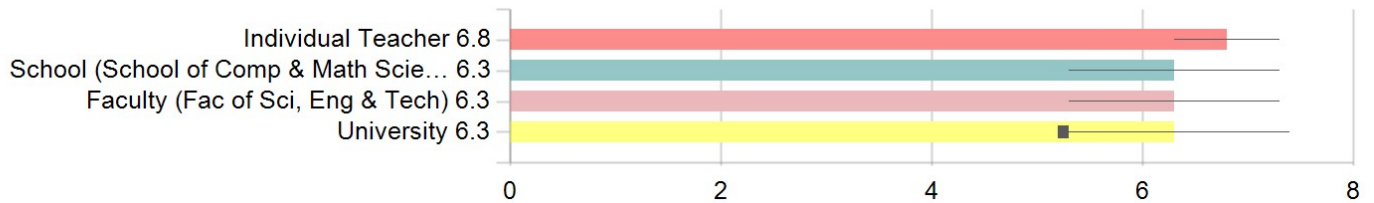

2025 Tri2 Comparison Statistics

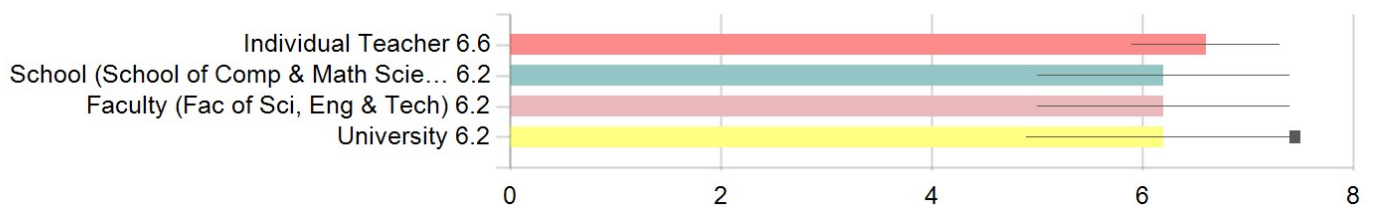

Mean (average valid student responses between 1 and 7) and Standard Deviation (Standard deviation of valid student responses) are used for comparison statistics between Individual Teacher, School, Faculty and University.

Hussain Ahmad...

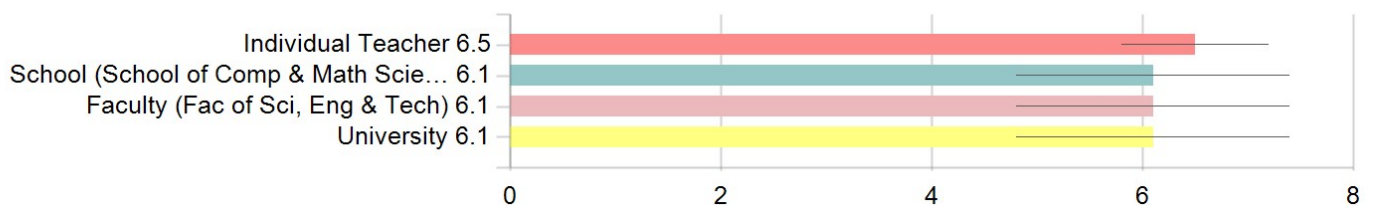

1. Is approachable and helpful.

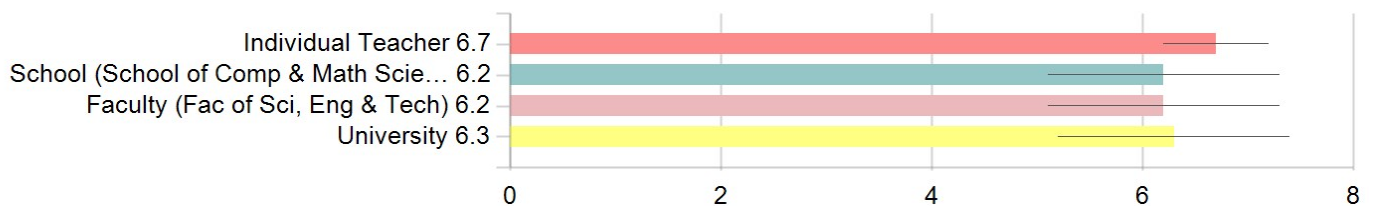

2. Gives clear explanations.

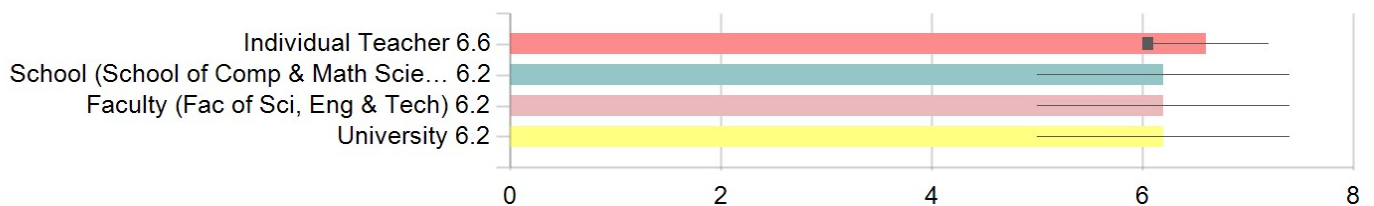

3. Makes their subject matter interesting.

4. Encourages student participation.

5. Provides useful and timely feedback on my work.

Hussain Ahmad... (continued)

6. Is an effective university teacher.
